Quality End of Life

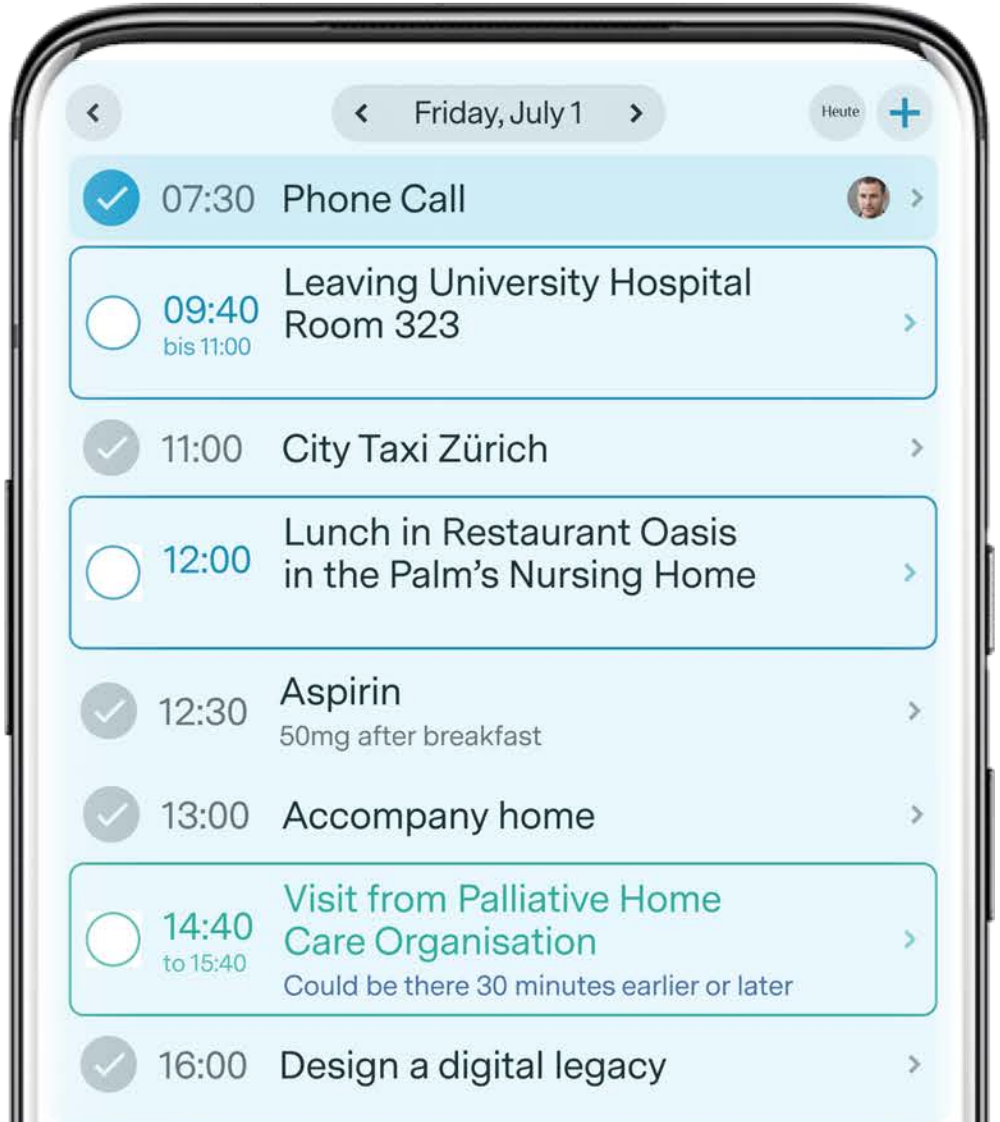
Changing the narrative of end-of-life

Connecting older adults with their carers and providers through convenient apps to personalize the end-of-life experience.

- Convenient end-of-life care coordination
- Access to ethically reflective IT for palliative care
- Design a digital legacy to say goodbye

Quality End of Life

Convenient end-of-life care coordination



Secured data exchange with care management IT systems to foster collaboration among inter-professional care teams and informal carers.

Access to ethically reflective IT for palliative care

play something with me

read me something

sing something to me

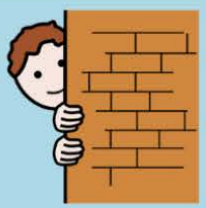
please help me

tell me a joke

hug me

tickle Me

please turn me around



hide yourself

go with your fingers

clap your hands

please scratch me

Bringing VR to Palliative-Care

New from today: METASTASEN-FREI-TAG!
From Monday: INSPIRATION into the new week.

Thank you for accompanying me. If you follow me, you will find out when I post something new.

Impact stories

Michèle reached out to take part in the project.
The social interactions gave her an energy boost. She became metastasis free.

Impact stories

She even went dancing. A series of interviews took place. Resulting in a digital legacy of a podcast series named: Hello and bye life

Follow Michèle's end-of-life journey on linkedin

Quality End of Life

Policy Dialogue

Swiss Carers statement on public consultation on the National Framework for Advance Care Planning (ACP)

- Integration of main carer in process, emergency plan.
- Education also for informal caregivers.
- Not only for long-term care but also for emergency psychological crisis events
- Special (digital) communication / awareness campaigns to carers.
- Definition of reference persons, social interations at the end-of-life.
- Use of digital technologies to update and share the document/care-plans.
- Harmonization of documents (medical emergency order, advance directive).
- Integration with public health record infrastructure and integration into emergency call centers processes.
