

Eldicare 2.0 Call for Participants: Free training programme in elderly care

Coordinated by AKMI S.A.

[EldiCare 2.0](#) is a European project co-funded by the Erasmus+ Programme of the European Union. It is developing and piloting a modern **training programme for people who work with — or care for — older adults**.

As part of the project, we are now inviting individuals in **Austria, Bulgaria, Czechia, France, Greece and Spain** to express their interest in taking part in the training pilot.

Participation is **free of charge**. Selected participants will follow a structured curriculum, gain a **recognised digital micro-credential**, and receive a **certificate of completion**.

We are looking for:

The programme is open to people involved in the care of older adults, including:

- Professional caregivers employed in a care facility or in home care;
- Students in a relevant field (i.e., nursing, social care, gerontology and related studies);
- Informal / family carers who look after an older relative or friend;
- Other professionals with an interest in elderly care (i.e., nurses, social workers, occupational therapists, physiotherapists, care-facility managers and similar roles).

The programme offers:

- A structured online curriculum delivered through a dedicated e-learning (MOOC) platform, available in your national language (German, Bulgarian, Czech, French, Greek, Spanish and English);
- A modular design of stackable units, so you can progress step by step at a manageable pace. The pilot curriculum comprises **10 stackable modules of 20 hours each** — approx. 200 hours in total;
- For a limited number of selected participants: an optional face-to-face component and, in some cases, a short work-based learning mobility abroad;
- A blockchain-based digital micro-credential and digital badge recognising the competences you acquire;
- A certificate of completion. The programme is undergoing international quality accreditation, expected during the project.

We ask of participants:

- A genuine interest in completing the training and engaging with the learning materials;
- Completion of the online modules within the pilot period: tentatively October–December 2026;
- Willingness to provide brief feedback that helps us evaluate and improve the programme.

To express your interest:

To take part, simply complete the short online **Expression of Interest form** (5 min).

Submitting the form does not guarantee selection. Where places are limited, participants will be selected on the basis of the target profiles above.
