What is Farmapram 2mg (Generic: Alprazolam)?

Farmapram 2mg is the **generic version of Alprazolam**, a benzodiazepine used primarily to treat **anxiety disorders, panic attacks, and stress-related conditions**. It helps calm the brain and nerves by enhancing the effects of a natural chemical in the body (GABA), promoting relaxation and mental clarity. Physicians often prescribe it for individuals struggling with severe anxiety or panic symptoms that disrupt daily life.

How Farmapram 2mg Works

Farmapram works by **slowing down the central nervous system**, reducing feelings of restlessness and excessive worry. When taken as directed, it can help

manage panic attacks and enhance sleep quality, allowing users to regain emotional balance and focus. However, because it is a controlled medication, it's crucial to follow medical advice and prescribed dosage carefully.
