What is Hydrocodone?

Hydrocodone is a prescription opioid used to relieve moderate to severe pain. It works by altering how the brain and nervous system respond to pain, offering effective relief after surgery, injury, or chronic pain conditions.

How Hydrocodone Works

Hydrocodone helps in pain management by:

- It binds to opioid receptors in the brain and spinal cord
 - Reducing pain signals and emotional response to pain
 - Providing long-lasting relief for acute and chronic pain
-
